お客さまのご理解とご協力をお願いいたします。 To all departing passengers,

During the period of "G20 JAPAN 2019 Osaka," you are required to undergo additional security measures when you go through the security checkpoint. It may cause you to experience longer lines and need more time to reach your gate. We recommend that you proceed to the security checkpoint as early as possible.

According to safety requirements, you are limited to one carry-on baggage except for personal items which must be small enough. Prior to boarding, cabin baggage that exceeds the limit must be checked in and have gone through the security checkpoint as early as possible.

Your understanding and cooperation is highly appreciated.
